Applications

Hidden Bites: Hole In The Wall Restaurant Finder [live](#) | [github](#)

A finder app that looks for less known restaurants with good reviews

- Worked with Javascript and JQuery to create a responsive page app with a team of 4 developers
- Use AJAX to retrieve restaurant data from Yelp API
- Implemented Google Maps API to visualize restaurant's location
- Applied mobile first responsive design practice using Bootstrap

Couch Pugtato [live](#) | [github](#)

An app that recommends movies and nearby restaurants

- Implemented Youtube, Yelp and MovieDB APIs with Axios calls
- Used React and Redux to dynamically create the pages with information from the various APIs
- Structured the site using React-Bootstrap

League of Boatwright [live](#) | [github](#)

A small boat building website for experienced and beginner boat builder

- Created website using Drupal 8 with a team of 6 developers
- Used View to relate different datas from entire website based on certain taxonomy or content
- Organized all datas into readable tables with sorting and filtering functionality

Gotta Match Them All! A Pokemon Memory Match! [live](#) |

[github](#)

A game that matches same Pokemon and evolve them to their final form

- Used JQuery and Javascript to dynamically create the game board
- Style the site and animated images with CSS and Sass
- Displayed and structured app using Bootstrap
