Technical Skills

Strong: Javascript, JQuery, HTML5, CSS, Drupal 8, Sass, ES6, Photoshop, React, Firebase

Experienced: Python, Java, C++, Php, MySQL, Redux, C

Dev Tools: PhpStorm, Komodo Edit, Git, Github

Example Applications

Hidden Bites: Hole In The Wall Restaurant Finder [live](#) | [github](#)

Developed a restaurant finder app that looks for lesser known restaurants with good reviews

- Worked with **Javascript** and **JQuery** to create a responsive page app with a team of 4 developers
- Designed app to retrieve restaurant data around user inputted location from **Yelp API**
- Implemented **Google Maps API** populating restaurant's location with the map
- Applied mobile first responsive design practice using **Bootstrap**

Couch Pugtato [live](#) | [github](#)

An app that recommends movies and nearby restaurants that are open at time of search

- Implemented Youtube, Yelp and MovieDB **APIs** with **Axios** calls
- Used **React** and **Redux** to dynamically create the pages with information from the various **APIs**
- Structured the site using **React-Bootstrap**

League of Boatwright [live](#) | [github](#)

Built a small boat building website for experienced and beginner boat builder

- Created website using **Drupal** with a team of 6 developers
- Used **View** to relate different datas from entire website based on certain **taxonomy** or **content**
- Organized all datas into readable tables with **sorting** and **filtering** functionality
- Built on **Bootstrap** theme for visual style and responsive design

Gotta Match Them All! A Pokemon Memory Match! [live](#) | [github](#)

Interactive game that matches same Pokemon and evolve them to their final form

- Used **JQuery** and **Javascript** to dynamically create the game board
- Style the site and animated images with **CSS** and **Sass**
- Displayed and structured app using **Bootstrap**

Professional Experience
